Akshaya Bollampally

Bachelor of Technology in Computer Science and Engineering, CVR College of Engineering, Hyderabad
+91-9502053216 | akshayabollampally@gmail.com | GitHub | LinkedIn
LeetCode | Codeforces | CodeChef | Portfolio

Professional Summary

Computer Science undergraduate with a 9.5 CGPA, focused on Backend Engineering, and Data Structures & Algorithms. Built production-style systems spanning REST API design, authentication, relational data modeling, and real-time event-driven architectures. LeetCode rating of 1700+ with 1000+ DSA problems solved; Girl Lead of the college GDG chapter. Seeking a Software Engineering Internship.

Education

CVR College of Engineering, Hyderabad — Sep 2024 – May 2028
B.Tech, Computer Science and Engineering — *CGPA: 9.5/10*

Sri Chaitanya Junior College, Hyderabad — May 2022 – June 2024
Intermediate (Telangana State Board of Intermediate Education) — *Score: 986/1000*

Personal Projects

ClearChit – Digital Chit Fund Management | *Java, Spring Boot, PostgreSQL, Redis, Docker* | GitHub

- **Engineered a Transparent Chit Fund Platform:** Architected a backend system to digitize chit fund operations end-to-end – group and member management, monthly contribution tracking, sealed bidding, payout processing, and dividend calculation – replacing error-prone manual ledgers with an auditable, rule-driven workflow.
- **Built an Immutable Audit Ledger:** Designed an append-only audit ledger in PostgreSQL for full traceability of every contribution, bid, and payout; used Redis with scheduled jobs to automate recurring monthly cycles, and covered core financial logic with JUnit/Mockito tests, containerized via Docker with GitHub Actions CI.

RENT-A-FIT | *MERN* | GitHub | Live Demo

- **Developed a Clothing Rental Marketplace:** Built a full-stack platform connecting clothing owners and consumers, supporting inventory management, secure rentals, cart functionality, and end-to-end order processing through role-based workflows.
- **Delivered Analytics and Access Control:** Implemented JWT-based authentication and interactive Chart.js dashboards to track earnings, expenses, rental activity, and platform performance for data-driven decision making.

RTPRA – Real-Time Priority Resource Allocator | *MERN, Socket.IO, EDF Scheduling* | GitHub | Live Demo

- **Architected a Real-Time Resource Allocation Platform:** Built a full-stack MERN application that prioritizes critical tasks competing for limited resources, enabling deadline-aware scheduling and reducing resource contention in dynamic environments.
- **Optimized Scheduling and Live Monitoring:** Implemented heap-based Earliest Deadline First (EDF) scheduling with anti-starvation (aging) and dynamic resource reallocation, backed by a Socket.IO-powered dashboard for real-time visibility into task queues, deadlines, and utilization.

Leadership

Girl Lead – GDG on Campus, CVR College of Engineering — 2026 – Present

- Lead the chapter's core team in planning technical workshops and community events, and encourage participation from women students in the developer community.

Technical Skills

Languages: Java, C, Python, JavaScript

Backend: Spring Boot, RESTful APIs, JWT Authentication, Socket.IO

Databases & Tools: PostgreSQL, Redis, Docker, Git, GitHub Actions, Postman, Render, Vercel

Frontend: HTML5, CSS3, React.js

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Scheduling Algorithms

Achievements

- **Problem Solving:** Solved 1000+ problems on LeetCode and CodeChef; LeetCode rating of 1700+ and max CodeChef rating of 1570+.
- **Academic Excellence:** 9.5/10 CGPA, consistently ranking in the top 5% of the Computer Science department.
