

AKSHAYA BOLLAMPALLY

Bachelor of Technology in Computer Science and Engineering

CVR College of Engineering, Hyderabad

+91-9502053216 | akshayabollampally@gmail.com | GitHub | LinkedIn | LeetCode | Codeforces | CodeChef

PROFESSIONAL SUMMARY

Computer Science undergraduate with a **9.55 CGPA**, focused on **Full-Stack Development, Backend Engineering, MERN Stack**, and **Data Structures & Algorithms**. Built scalable web applications featuring **REST API development, JWT-based authentication, CRUD operations**, and **real-time systems**. Solved **500+** DSA problems and actively seeking a **Software Engineering Internship**.

EDUCATION

- CVR College Of Engineering, Hyderabad** Sep 2024 – May 2028
B.Tech, Computer Science and Engineering
CGPA: 9.55/10
- Sri Chaitanya Junior College, Hyderabad** May 2022 – June 2024
Intermediate (Telangana State Board of Intermediate Education)
Score: 986/1000

PERSONAL PROJECTS

RENT-A-FIT | Node.js, Express.js, Chart.js, JWT, MongoDB | GitHub | Live Demo

- Built a Clothing Rental Marketplace:** Developed a full-stack platform connecting clothing owners and consumers, enabling inventory management, secure rentals, cart functionality, and end-to-end order processing through role-based workflows.
- Implemented Business Analytics and Access Control:** Designed JWT-based authentication and interactive **Chart.js** dashboards to track earnings, expenses, rental activity, and platform performance for data-driven decision making.

RTPRA Real-Time Priority Resource Allocator | MERN, Socket.IO, EDF Scheduling | GitHub | Live Demo

- Built a Real-Time Resource Allocation Platform:** Developed a full-stack MERN application that prioritizes critical tasks competing for limited resources, enabling deadline-aware scheduling and reducing resource contention in dynamic environments.
- Implemented Efficient Scheduling and Monitoring:** Designed heap-based **Earliest Deadline First (EDF)** scheduling, anti-starvation (aging), dynamic resource reallocation, and a **Socket.IO**-powered dashboard for real-time visibility into task queues, deadlines, and resource utilization.

Task Manager App | MERN Stack, Axios | GitHub | Live Demo

- Built a Personal Productivity Platform:** Developed a full-stack MERN application that enables users to organize, track, and manage daily tasks through secure, user-specific workspaces and intuitive task management workflows.
- Implemented Secure Task Management APIs:** Designed JWT-based authentication, role-protected routes, and RESTful CRUD APIs to support task creation, updates, deletion, and completion tracking with persistent data storage.

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO

Databases & Tools: MongoDB, Mongoose, Git, GitHub, Postman, Render, Vercel, NPM, Multer, Chart.js

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, OS, Scheduling Algorithms

ACHIEVEMENTS

- Problem Solving DSA Proficiency:** Solved **500+** problems on LeetCode and CodeChef; achieved a max rating of **1517** on CodeChef and 1002 on CodeForces.
- Hackathon Participant:** Shortlisted for the final round of **HackVibe** among 50+ competing teams.
- Academic Excellence:** Secured a **9.55/10 CGPA**, consistently ranking in the **top 5%** of the Computer Science department.
